SPRING RANDOM FACTS

By: Colton Tharpe and John Brody Fournet

- Spring fever is a real syndrome.
- Benjamin Franklin was the first to propose daylight savings time in 1784.
- March 20th is also National Ravioli Day!
- The birthstone for March is the aquamarine
- The birth flower for March is daffodil
- The first day of spring is called the vernal equinox. What does that stand for you ask? 'Vernal' is Latin for spring while 'equinox' is Latin for 'equal night'.
- The first spring flowers are typically daffodils, dandelions, lilies, tulips, iris and lilacs to name a few.
- Baby birds learn to sing during spring. Although they are born with the ability to sing, they must learn the specific songs of their species. They often learn their songs within two months of being born.
- Arizona and Hawaii do not follow daylight savings. They already have enough sunlight and hot weather, so it doesn't make sense to confuse the sleeping cycle of their residents.
- Daylight Savings Time begins March 8th – spring ahead!
- The Latin word for “season” is sationem, meaning “seed time.”
- In literary works, spring is often used to represent birth, a revival, and the start of happy and better times.
- Although baby birds are born with the ability to sing, they usually don't learn how to until spring, when they hear other birds chirping while looking for a mate.
- In Japan, they believe spring begins once their national flower, the [cherry blossom](#), starts to bloom.
